

X-treme Auger Drive

Our X-treme Auger Drive has an intermittent pressure of 3000 psi and a continuous pressure of 3500 psi. The auger consists of a motor and a gear box, with no chains to break or come loose. It comes complete with mounting plate, hoses and couplings, with no need to pay extra for anything. The output shaft is either a 2" hex or 2-9/16" round drive and is powerful enough for the toughest jobs.

Speed

Depending on the flow of each machine, the auger speed can be a max of 68 RPM.

- Gear driven (no chains)
- Mounting plate, hoses and couplings included
- Various auger bit sizes and styles are available
- Heavy duty output shaft
