

# SWING HOE

For Skid Steer Loaders

**Bradco Swing Hoes**, by Paladin, provide 140° of rotation to allow the placement of spoil outside the tracks of a 72 inch wide skid steer.

- Bucket linkage improves bucket breakout force and increases bucket rotation
- Bucket sizes available: 8", 10", 12"
- Cushioned swing cylinder for smooth operation with equal swing force in both directions
- Replaceable hardened bushing and grease fittings on all pivot points for reduced maintenance costs
- High strength pins provide increased wear resistance
- Optional hydraulic kits available
- Engineered and tested in rigorous real-life conditions

Specifications	
A. Maximum Dig Depth	76"
B. Maximum Reach	78"
C. Swing Angle	140°
Weight with 12" Bucket	535 lbs
Bucket Dig Force	3,800 lbs

Host Machine Requirements	
Lift Capacity	30 HP or 1,200 lbs
Minimum Auxiliary Hydraulics	6 GPM
Power Source	12 Volts
