

## **GT-77-ATV Electric Broadcaster**

The model GT-77-ATV
eliminates hours of time spent
hand-seeding. Its unique
vibrating style agitator ensures
the Sure-Feed of material
being spread, even small or
light seed varieties.
The maneuverability of today's
ATVs or UTVs will leave little or
no tracks on your field or lawn,
and will allow you to spread in
hard to reach locations.

The adjustable seed gate design allows you to spread a wide variety of materials. It also uses a centering plate system for adjust the throw pattern.

The GT-77-ATV uses a 12-volt motor (low amp draw). A wiring harness equipped with a fuse for motor production and quick coupler for easy attachment and removal. A four-bladed plastic fan ensures an even pattern spread. The heavy duty grey-iron base and galvanized hopper are rugged enough for years of trouble-free operation.
