INDOOR | OUTDOOR RADIANT HEAT

MADE IN THE USA

**SUNFIRE 150**

**150,000 BTU's**  
**DIESEL FUEL**

## HEATS LIKE THE SUN

Just like the sun, SunFire heaters warm objects directly through infrared radiant technology at 150,000 powerful BTU's. There is no engine or forced air.

## SUPERIOR TO FORCED AIR HEATERS

Traditional torpedo heaters can be loud, smelly, and use an inefficient process by blowing hot air around objects to transfer heat. SunFire heaters are quiet, odorless & efficient by warming people, equipment & objects directly without blowing air.

## THE POWER SOURCE

Runs on Diesel or #2 fuel and a 120V power source drawing only 2 amps. Generators or pure sine power inverters (800W min) on a pickup truck can be used.

### PAYS FOR ITSELF WITH DIESEL
