

Herd

HERD SEEDER

#579 Rope Control Kit

Using the two 5/16 x 1 inch bolts provided bolt the “L” shaped handle on to the end of your existing control handle as shown by arrow #1 (bolt – flat washer – L shaped handle – control handle lock washer – nut). At arrow #2 remove the bolt holding your brace rod on and replace with the pulley bolt (bolt – slip nut – regular nut – brace rod – casting – nut. Run one end of rope through the pulley and then through the bottom hole of the L – shaped piece – tie a knot in the rope to keep it from pulling through. Run the other end of the rope through top hole of the L – shaped piece and tie a knot in it to keep it from pulling through the hole. Take the rope to the seat of your vehicle. Pull one of the rope to open your seed gate and the other to close it.
