

# ROTARY RAKE

## Model SR320/8

**Model SR320/8 in working position**

**Model SR320/8 in transport position**

Sitrex offers a light duty economical rotary rake for small farm operation. This rake is a three point hitch machine powered by the tractor PTO shaft. Raking arms are cam activated and very gentle on the hay, providing for clean pickup and a fluffy windrow. Height adjustment is controlled mechanically so there are no hydraulic hoses required. The raking operation is simple, efficient, and gentle on the crop.

- ⇒ Category I three point hitch
- ⇒ Eight raking arms
- ⇒ Three rake tines per arm
- ⇒ Multi position tine arms for different widths
- ⇒ Maximum raking width 10'
- ⇒ Transport width 5'
- ⇒ Multi-position swath deflector
- ⇒ Tire size 15 x 6.00-6

*If your requirements are for a larger pull-type rotary rake, look to the Sitrex SR420/11H. This model offers full hydraulic height control and a raking width of 13'9".*
