

THE LANDSCAPERS' CHOICE

Kasco's Innovative Primary Seeder is Ideal for Prepared Seedbeds. Utilizing our "Walking Beam" technology, the Landscapers' Choice follows the terrain's contour for maximum seed-to-soil contact. Changing seed rates is simple and quick; no tools or plates to change. One seedbox will handle most seed varieties. The Seed Chute delivers the seed evenly across the entire width of the machine. Our ground driven seed metering system is consistent and will stop seed flow when the implement is stopped. 5' and 6' Working Widths available.
